Application for Water and/or Sewer Tap

THE FOLLOWING REQUIREMENTS MUST BE COMPLIED WITH BEFORE SERVICE CONNECTION:

1. The tap fee must be paid 2 weeks prior to the Town's work. **Billing for service will begin immediately after installation.**
2. Once tap has been made, water service will not be installed until an application for service has been completed.
3. The applicant or the plumber must purchase a plumbing permit before work is to begin on property.
4. **FOR SEWER TAP:** Aberdeen Code of Ordinances, Section 50.32 (f) reads: "Whenever a septic tank is abandoned for any purpose; it shall be solely the property owner's responsibility to dispose of the sewage and fill-in or remove the tank such that it shall not create a health or other safety hazard. It is recommended that all tanks be pumped empty and filled with sand or to be torn out. Tanks deemed by the Town to present a health or safety hazard shall be required to be pumped; filled-in or removed."
5. **FOR WATER TAP:** A water cut-off valve and valve box are provided with water service tap fee. The owner's responsibility begins at the female connection on the customer side of the meter box and including the 3/4 valve and box.
6. **FOR WATER TAP:** The water pressure at the location of your tap is _____ PSI. If the water pressure is too high, it is your responsibility to have a pressure-reducing valve installed at your expense.
7. **FOR WATER TAP:** If you are currently on a private well, before you connect to Town service, all lines from the existing well must be disconnected and in no way connected to the Town water supply system.
8. At the discretion of the Public Works Director, in certain cases more than one user per meter connection may be allowed. If allowed, a base fee will be charged for each additional user and owner of property will be responsible for all water/sewer charges.
